Always a better solution.

The Most Sustainable Palm Oil in the World

We are a proud member of Palm Done Right™

DESCRIPTION	APPLICATION
Organic Palm Olein 24C	Frying, Salad Oils, Sauces
Organic Palm Shortening MP36	All Purpose, Baking, Frying
Organic Palm Shortening MP42	All Purpose, Baking, Frying
Organic Palm Stearin MP48	Nut butters
Organic RBD Palm Oil	All Purpose, Baking, Frying
Organic RBD Palm Kernel Oil	Liquid Soaps, Detergents
Organic Red Palm Oil, Unrefined, Filtered 36C	Nutraceutical

BENEFITS:

- Concentrated source of Vitamin A
- High in antioxidants
- Richest source of powerful Vitamin E tocotrienols

Barentz.

Always a better solution.

There is a solution that centers around organic, preserves the environment, and treats people fairly

Natural Habitats Group has created **a movement to prove that palm oil can be grown for good**, and show that when “done right,” palm oil can **bring significant positive impact to the world**.

That movement is called Palm Done Right™, and is bringing together manufacturers, retailers and consumers to increase awareness around the environmental and social benefits of palm **grown organically, with fair-trade practices, working with small farmers and the ethical treatment of farm and plantation workers**. It is the highest possible standard for palm oil, and goes above and beyond any other certification program.

Palm Done Right™ Goes Beyond The Standard

Organic

Traceable

IDENTITY PRESERVED

SEGREGATION

Enables users to make the same claim as IP oil but allows for mixing RSPO certified palm oil from a variety of sources.

MASS BALANCE

Permits mixing of RSPO certified and conventional palm oil at any stage in the supply chain. Both types of oils must be monitored and tracked.

Allows everyone in the supply chain to demonstrate their commitment to sustainable palm oil.

BOOK & CLAIM

Certified palm oil is represented by tradeable certificates. Producers of Certified palm oil sell certificates to end users who want to support production of sustainable palm oil.

Palm can be traced to a particular mill and particular supply base. Oil is physically isolated from other product in the supply chain, ensure the customer only buys product that is RESP sustainable certified palm oil.

For Animals- saying no to clear cutting and yes to actively preserving animal habitats.

For Farmers- being partners in creating a more sustainable, equitable supply chain

For Communities- builds communities: medical clinics, sports programs for local children, education, nutrition, youth groups, garbage disposal, recycling, etc.

For the environment- Animal and plant waste is composted to nurture soil. Multi-cropping, no synthetic pesticides, herbicides, or fertilizers.

NO CONFLICT PALM
